

Research topics of a DPT granted project (started in 2006):

- *Further Investigation of **EDM (Electric Discharge Machining)** for micro machining*
- *Theory and Applications of **Micro EDM (Sarix type)***
- *Design Principles of **Micro Machines and Micro Robotics***
- *Further Development of a new **Artificial Muscle** for Micro Machines/Robots*

Research topics of a Atılım University funded project (Proposal):

- *Further Studies on the **Theory of Engineering Design (Co-Supervised)***
- *Theory and Implementation of **Biomimetic Design** for Engineering Practice*

Research topics from a TÜBİTAK funded project (Proposal):

- *Further Studies on the **Theory of Engineering Design (Co-Supervised)***
- *Theory and Implementation of **Biomimetic Design** for Engineering Practice*
